

FIVE TALENTS FINANCIAL GROUP

Business for Sale

December, 2022

EBID \$800,000

Our client is unlike any other contractor in their region. They fabricate and build low-rise steel-framed buildings, furnishing and erecting these steel buildings. They excel when the project designs get complicated.

Unlike other contractors, they have an Industrial Services division that provides maintenance and small project services for their customers long after the building project is complete. This company also has a steel fabrication shop, and are able to bundle all of this together to provide the best service and quality.

They have developed long lasting relationships with their customers, suppliers, and employees. The reason the owners have decided to sell is because they are reaching retirement age and have multiple other interests.

Please contact Steve Keck.
